

we Innovate

Advance Machince Vision

Our high performance PC-based vision system offers solutions for a wide-range of industry from Semiconductor, PCB assembly, lead frame, pharmaceutical, medical and many more.

About Us

TT Vision is a technology driven company specializing in the development of automated machine vision solutions. We offer one of the most cost effective PC-based vision systems through innovative solutions developed in-house. The high speed, high accuracy and highly repeatable system is the result of years of research of refinement from field tests.

Our Vision

To Innovate Equipment Inspection

Our Mission

To Be A Leading Brand in Equipment Vision Inspection

Business Activities

Optoelectronics Inspection Equipment

Discrete Component and IC Inspection Equipment

Solar Inspection and Sorting Equipment

Vision Guided Robotic Equipment
